START

What 687 Italy does

687 Italy is one travel companion for the whole trip: you plan and book before departure, then use the same trip every day while you are in Italy.

Plan: budget, dates, flights, accommodation, rental car and a multi-city route.

Organize: itinerary, daily budget, Wallet, packing list and offline essentials.

Travel: Nearby places on a live map, navigation, Drive, Translate and the Voice Assistant.

Stay ahead: Intelligent Day with Today, NOW, Prevent, Guardian, Signals and Rescue.

TIP
Everything works on one plan. Nothing you add in one screen creates a second, separate itinerary.

LANGUAGE

One language for app and voice

On first launch you choose your language. The same language is used for the menus, for Voice Assistant commands and for its spoken replies.

Change it any time in Settings → App & Voice Assistant language.

Translate stays separate: there you choose which language you speak and it always translates into Italian.

The RESET TO ENGLISH button in the voice menu brings the app back to English in one tap.

TIP

Voices come from your phone. Available voice names can differ between iPhone and Android.

DISCOVER

Start with what inspires you

The opening screen groups ideas by theme: Art & History, Sea & Coastline, Mountains & Lakes and food.

Open a category to see places worth visiting.

Places marked BOOK AHEAD often sell out: reserve them before departure.

TIP

Use Discover while choosing which cities to include in your route.

NEW TRIP · STEP 1

Budget, dates and travelers

Enter your total budget, travel dates, type of trip and number of travelers.

Choose Plan everything to be guided through flights, accommodation and car rental.

Your total budget becomes the base of the daily budget used during the trip.

TIP

You can start a new trip at any time: the current one is archived first, so nothing is lost by mistake.

NEW TRIP · STEP 2–3

Flights to Italy

Enter your departure airport. 687 Italy highlights the Italian airports you can reach with a direct flight.

Pick the arrival airport that fits your route.

Review route, dates and travelers, then open a real flight search with a partner.

Your route and dates are carried into the search when supported.

TIP

Prices and conditions are set by the partner. Flexible dates often show more direct options.

NEW TRIP · STEP 4

Accommodation

Choose where you want to stay. City, dates and travelers are shown before you leave the app.

Compare hotels with Agoda, Expedia or Hotels.com.

Vrbo has its own button for apartments and holiday homes.

After booking, enter what you paid: it becomes part of your trip budget.

TIP

Save the address in the trip so Navigate can take you there later.

NEW TRIP · STEP 4

Rental car from 21 airports

If you plan to drive, search rental cars with Kayak directly from your arrival airport.

Supported airports: Rome FCO and CIA, Milan MXP, LIN and BGY, Venice VCE and TSF, Naples NAP, Turin TRN, Genoa GOA, Bologna BLQ, Bari BRI, Pisa PSA, Verona VRN.

South and islands: Catania CTA, Palermo PMO, Lamezia SUF, Reggio Calabria REG, Olbia OLB, Cagliari CAG, Alghero AHO.

Pick-up and return dates come from your trip.

TIP

After booking, enter the price: it is added to your budget.

MULTI-CITY

Build a route across Italy

Turn on Visiting other cities too? and set the day you arrive in each city.

Between cities choose train, internal flight or drive.

This route becomes the structure of your Itinerary and of the Drive calendar.

TIP

Keep at least one full day per city: transfer days are shorter than they look.

ITINERARY

Your trip, day by day

The Trip Calendar shows the city of each day. Tap a date to open its plan.

- Add places, times and notes to each day.
- On a city-change day the transfer is shown at the top.
- Save the itinerary as a PDF for a simple offline copy.

TIP

Itinerary is always available, also before you arrive in Italy.

CITY TRANSFERS

Trains, flights or driving

Open a transfer day and choose Check trains, Check flights or Navigate.

Prepare the move to the next city before the travel day.

Navigate opens your preferred map app toward the next city.

TIP

Train strikes happen in Italy: check the day before you travel.

DAILY BUDGET

Control spending day by day

Log expenses during the trip and see what is left for today.

Spend more today and the suggested average for the next days goes down.

Spend less and it goes up.

Intelligent Day reads the same expenses: you never type them twice.

TIP

Set your total budget first, then the daily numbers make sense.

WALLET

Travel documents in one place

Keep flight, rental-car and accommodation details together, with tickets, boarding passes and confirmations.

Add a document when you receive it.

Keep copies of your passport page here in case it gets lost.

TIP

Wallet is for travel documents and booking references, not for credit cards or bank details.

PACKING

Packing checklist

Start from suggested essentials and tick items as you pack.

Add your own items at the bottom.

The list belongs to the current trip, so you can check it again before leaving.

OFFLINE

Offline essentials

Offline shows the information already saved in 687 Italy, even without a connection.

Your itinerary, accommodation, Wallet details and quick Italian phrases.

Live maps, weather, Nearby searches and live prices still need internet.

TIP

Open Offline once before you lose signal, so you know where everything is.

NEARBY

Places around you on a live map

Nearby uses your GPS position to find restaurants, cafés, sights, shops, pharmacies, parking and more.

- The map moves and zooms freely with your fingers.
- Tap a place to preview the direction on the map.
- GO starts real turn-by-turn navigation now.
- + Plan saves the place into today's itinerary.
- Switch between On foot and By car.

TIP

Open/closed status comes from live place data and can change.

NEARBY EXTRAS

Practical help where you are

Under the results Nearby shows quick cards for everyday needs.

🚕 Taxi: local taxi numbers, the itTaxi app and your destination ready to show or read to the driver.

🚻 Public toilets: verified public toilets near you.

💧 Drinking water: fountains where you can refill your bottle for free.

💶 Save money: simple local tips, e.g. supermarkets instead of shops next to monuments, coffee standing at the bar.

🧳 Leave your luggage: storage near you when you arrive early, check out early or change city.

NAVIGATE

Open your favourite map app

Hotels, itinerary stops and Nearby places have a Navigate button.

- On iPhone choose Apple Maps, Google Maps or Waze.
- On Android choose Google Maps or Waze.
- Navigation always starts from where you are now.

DRIVE

Driving days and parking

If your route includes driving, Drive builds the travel days between cities automatically.

Each button points from your current position to the next city.

Save where you parked: garage name, phone number and position.

Watch for ZTL zones: many city centres are closed to cars, and fines arrive by mail.

TIP

Always follow road signs, local rules and current traffic.

TRANSLATE

Speak or type, hear Italian

Choose the language you speak, then type or tap the microphone. 687 Italy translates into Italian and can read it aloud.

- Read aloud lets the other person hear the Italian sentence.
- Quick phrases for Italy are ready for common situations.
- Copy the Italian text with one tap.

TIP

Before using the microphone, choose the correct speaking language for better recognition.

VOICE ASSISTANT

Ask the app with your voice

Tap the microphone of the Voice Assistant and say what you need, in your app language.

Examples: “toilets nearby”, “search flights”, “find a hotel”, “rental car”.

Also: “budget”, “itinerary”, “translate”, “rescue”, “offline”.

The assistant opens the right screen and answers out loud.

If it does not understand, it tells you and you can try again.

TIP

Voice commands use the language chosen in Settings. Translate is separate.

OVERVIEW

How Intelligent Day works

Intelligent Day keeps balancing time, weather, position and budget during each day of the trip.

It reads the same itinerary and expenses you already entered.

It never creates a second plan: Itinerary and Nearby write to the same plan you see.

Its screens: Today, NOW, Budget, Prevent, Guardian, Signals and Rescue.

TIP

Open Intelligent Day from the main dashboard.

TODAY

Today at a glance

Today shows the stops planned for the current day and how the day looks.

- Stops, times and the next fixed plan.
- Weather and budget status for today.
- From here you can report a problem on your route.

NOW

What can I do now?

One tap checks your GPS, the weather, your budget and the places around you.

NOW suggests what makes sense right now, around your next fixed plan.

GO navigates immediately; + Plan saves the place into today.

If it rains, it favours museums, covered places and food.

If today's budget is low, it favours cheaper options.

TIP

Use NOW whenever something changes: a delay, rain, a closed sight or a free afternoon.

BUDGET

Today's budget

Reads the expenses from your itinerary and shows what you can safely spend today.

Warns you when today's budget is getting low.

NOW then favours affordable choices with verified prices when available.

PREVENT

Problems before they happen

Prevent checks the weather and active traveler reports against today's itinerary.

Heavy rain on an outdoor stop, reports of crowds or closures at a place you plan to visit.

You see the problem early and can change the plan with NOW.

GUARDIAN

Automatic alerts

Guardian is the notification part of Intelligent Day. It warns you when something important may affect your day, even when the app is closed.

- Weather changes, time to leave, route problems and important Signals.
- Turn it on once and allow notifications.
- Send a test alert to check it works.
- Pause Guardian at any time.

TIP

Guardian uses the same itinerary, weather and route: never a second plan.

SIGNALS · 687 PULSE

Reports from other travelers

Signals is connected to today's plan. If something happens at a stop or on the way, report it in two taps: GPS and time are added automatically.

Reports are shared between 687 travelers through 687 Pulse.

Other travelers can confirm a report, or mark it as gone.

Without connection your report stays on the phone and is sent later.

TIP

Examples: parking full, long queue, closed entrance, strike, road works.

RESCUE

When something goes wrong

Rescue gives clear next steps for the most common travel problems.

- Lost passport: police station, embassy or consulate, Italian phrase, copies in Wallet.
- Feeling unwell: hospital or pharmacy nearby and an Italian help phrase.
- Train, metro or bus delay; flight cancelled or badly delayed.
- Lost or unsure where to go: your exact position and the nearest police station.
- Then open NOW to rebuild the rest of the day.

TIP

In an emergency in Italy call 112.

TOOLS

Weather, currency, emergency

Quick checks while you move around.

- Live weather for your GPS position.
- Currency converter with current rates.
- Emergency numbers and practical help.

TIP
Weather and exchange rates need internet.

SETTINGS

Language, theme and recovery

Change the app language, the theme, and manage previous trips.

- Restore an archived trip for a limited time.
- Save a past trip as a memory PDF.
- Delete a trip permanently.

PERMISSIONS

What the app asks and why

Each permission is used only for its feature.

- Location: Nearby, NOW, Prevent, Signals, Drive and weather.
- Notifications: Guardian alerts.
- Microphone: Translate and the Voice Assistant.

TIP

If something does not work, first check that the permission is allowed in the phone settings.

TROUBLESHOOTING

Common problems

Nearby or NOW is empty → check location permission and internet.

Live map not available → live tools work when GPS confirms you are in Italy.

No Guardian alerts → allow notifications, then send a test alert.

Microphone does not work → allow microphone and choose the right language.

Wrong language → Settings → App & Voice Assistant language.

TIP
